Hi Jennifer,

I bet Seattle is a hung over mess today! Wow... what a game!

Recall from our conversation a while back that I did not know if we would ask for the bolstering of the RBA justification in the FS response to comments or as a separate 'memo'. I think the issue was represented in the comments on the FS, however, it seems it would be best to get something on the RBA before the response on the FS is complete. I imagine the response to the FS comments will take a good chunk of time, the RBA issue will inform the FS, and since we also need to send the RBA response back through our HQ folks, we should go with a separate response. I'm not sure what you had in mind, but as far as we are concerned, it does not have to be a formal Tech Memo or the like... whatever would be simplest and quickest.

Let me know if you would like to discuss further.

Phil
